CSE 445/598

Read Me:

I contributed 100% to this project as both of my group members dropped the class 1 to 2 days prior to submission. The system idea was mine as well as the control flow diagram.

As a result, I chose two more required services to be my two electives and added a fifth and sixth service as my RESTful services. One of the RESTful services may not work and service references for the WebApp TryIt page are in localhost as I could not get webstar to work. (404 error)
